## TRAINING

INFOLABZ (Ahmedabad)  
Python-django developement

## PROFILE

A recent BCA graduate from Gujarat University with foundational knowledge of multiple programming languages including HTML, CSS, JavaScript, Python, and Django. Passionate about web development and data analysis. Experienced in full-stack development and data wrangling using Pandas. Eager to grow as a Data Analyst or Web Developer in a dynamic, real-world environment.

## PROJECTS

### Accounting & Business Service Website (Client Project)

[Live Project Link](#)

Developed a professional service-based website for a certified cost accountant (CMA) to showcase accounting, tax, and registration services. Implemented service listing, detailed service pages, contact forms, dynamic enquiry handling, mobile responsiveness, and a blog section for SEO.

### Swiggy Food Orders Analysis (Data Analysis Project) [GITHUB LINK](#)

[Swiggy Dashboard Link](#)

Used Python and Pandas to analyze food delivery data. Explored order trends, peak times, and customer preferences. Applied data cleaning, groupby, and Excel visualization to derive actionable insights. Skills: Pandas, Excel, Data Cleaning, Grouping, EDA

### RJ Jewellery (Client Project) [GITHUB LINK](#) [Live Project Link](#)

Created an e-commerce website for RJ Jewellery, enabling the client to upload product details and images of jewellery items. Customers can browse, search, and purchase products seamlessly. Integrated secure payment features and a user-friendly admin panel for product management. The website supports smooth navigation, responsive design, and an efficient backend for managing orders and inventory.

### Byju's Student (Data Analysis Project) [Github Link](#)

Worked on a student performance analysis project for Byju's. Used Excel and Python to clean and analyze student data to identify learning trends, weak topics, and engagement levels. Created visual dashboards and reports to present findings. Learned real-world data handling, teamwork, and performance tracking techniques. Skills: Excel, Python, Data Cleaning, Charts, Reporting

### ShopOutfits Website [GITHUB LINK](#) [Live Project Link](#)

Developed a clothes rental website with dual-role functionality, allowing users to rent outfits or list their own for rent. Implemented user login, image uploads, renter dashboard, and full CRUD operations for items including price, size, and availability.

### Jarvis (Mini Voice Assistant) [GITHUB LINK](#)

Built a mini voice assistant application that responds to user voice commands by performing tasks such as opening YouTube, Facebook, and other basic system commands. Utilized Python libraries for speech recognition and command execution, creating an interactive and hands-free user experience. This project demonstrates skills in Python programming and voice interface development.

## EDUCATION

### Bachelor Of Computer Application

2022-2025

At Gujarat University

CGPA: 7.64 / 10 (Approx.) | Percentage: 72.57%
